The Saudi Development and
Reconstruction Program for Yemen

From The Heart of The Kingdom
to The Republic of Yemen..

Impact That Inspires Hope

Third Quarter 2026 Report

The Saudi Development and Reconstruction Program for Yemen (SDRPY) continues to implement projects and initiatives guided by a development vision that integrates infrastructure development, improved access to essential services, and stronger institutional and human capacities. This integrated approach enables vital sectors to perform their roles more effectively, supports the sustainability of essential services, and contributes to recovery and development efforts in the Republic of Yemen.

During the third quarter of 2026, the Kingdom of Saudi Arabia provided additional economic support to the Central Bank of Yemen through SDRPY. At the same time, SDRPY continued to implement projects and initiatives across key sectors, focusing on infrastructure development, improved service delivery, institutional capacity-building, and human capital development.

Moreover, the quarter saw expanded cooperation with local, regional, and international partners, the launch of joint projects, and SDRPY's participation in various development forums. These efforts facilitate knowledge exchange, strengthen coordination among stakeholders, and help align development initiatives with Yemen's priorities.

This report highlights SDRPY's key activities from July to September 2026, including progress on development projects and programs, economic support, strategic partnerships, capacity-building initiatives, and major developments across its areas of operation.

July 2026

Yemeni Prime Minister Visits Prince Mohammed bin Salman Hospital in Aden

Aden | At the Prince Mohammed bin Salman Hospital, beneficiaries receive comprehensive healthcare from doctors and staff working with modern medical equipment. Yemeni Prime Minister H.E. Dr. Shaya A-Zindani visited the hospital, reviewed its services, and assessed its medical capabilities. He commended the doctors and staff for their medical and humanitarian work, as well as the vital role SDRPY plays in implementing strategic, sustainable projects. Dr. A-Zindani affirmed that the hospital exemplifies the development partnership between Yemen and the Kingdom of Saudi Arabia and demonstrates the direct impact of Saudi support on the ground.

July 2026

Powering Socotra: 7,500 Tons of Diesel Delivered

A shipment of 7,500 tons of diesel provided by the Saudi Development and Reconstruction Program for Yemen (SDRPY) has arrived in Socotra Archipelago Governorate ahead of the windy season. The supply will support the continued operation of power generation stations and help maintain the stability of essential services throughout the season, which typically lasts around four months.

Yemen Partners Group (YPG) Holds Meeting at SDRPY Headquarters

The Yemen Partners Group (YPG) held a meeting at SDRPY's headquarters in Riyadh, co-chaired by representatives of the United Kingdom and the United Nations Resident Coordinator's Office in Yemen, alongside the World Bank Group. The meeting brought together representatives of UN agencies, international organizations and donor partners to discuss development challenges in Yemen, strengthen coordination, and explore ways to accelerate development efforts.

July 2026

Voluntary National Review Highlights SDRPY's Experience in Supporting Sustainable Development

New York | The Kingdom of Saudi Arabia presented its third Voluntary National Review (VNR) at the 2026 High-Level Political Forum on Sustainable Development (HLPF), reaffirming its commitment to accelerating progress on the Sustainable Development Goals (SDGs) and advancing the objectives of Saudi Vision 2030. The report featured SDRPY's experience in supporting sustainable development under SDG 17: Partnerships for the Goals, reflecting the Program's approach to building strategic partnerships that align efforts and maximize development impact.

Sabah Hospital Enters Final Equipment and Fit-Out Phase

Construction work at Sabah Hospital in Abyan Governorate has been completed, with the project progressing to the final equipment and fit-out phase. The hospital includes inpatient rooms, operating theatres, an emergency department, outpatient clinics and specialized medical departments. Equipping the facility will strengthen healthcare services and improve access to medical care for local communities.

July 2026

Hidaybu Technical Institute: Investing in Skills and Opportunity

Work is progressing on the construction and equipping of the Technical Institute in Hidaybu, Socotra. The institute will offer technical and vocational training in fields including engineering, telecommunications and information technology, agriculture, women's crafts, electronics and mechanics, helping expand access to skills development and vocational education.

The Digital Empowerment Project for Yemeni Teachers Concluded

Upskilling Yemeni professionals remains central to the Program's long-term strategy. The Digital Empowerment Project for Yemeni Teachers has concluded, empowering 530 teachers and educational supervisors from across Yemen. The project, funded by SDRPY in partnership with Yemen's Ministry of Education and implemented by the Almobdioon Center for Studies, Consulting, and Training at King Abdulaziz University, involved a dual-track program and trained educators across Aden, Abyan, Hadhramout, Al Mahrah, and Socotra.

With 20 experts and training consultants overseeing the program, it delivered 43 digital learning units on artificial intelligence applications and digital course design. The units provided education professionals with modern resources, supported teaching and learning quality, and combined online and hands-on learning to benefit thousands of students.

July 2026

Strengthening International Partnerships to Advance Development

SDRPY held a series of meetings with international partners and officials to strengthen development cooperation and explore opportunities for coordination and joint initiatives supporting Yemen.

The meetings included a delegation from the UK Foreign, Commonwealth & Development Office (FCDO): Ms.Esther Ruiz, Head of Mission of the International Monetary Fund (IMF): Mr. Mohammed Jaber, the IMF's Resident Representative in Yemen: Dr. Amin Al-Qadasi, Yemen's Minister of Higher Education and Scientific Research: Mr. Giuliano Fragnito, Counselor and Deputy Head of Mission at the Embassy of Italy in Saudi Arabia: Mr. Yoichi Nakashima, Ambassador of Japan to Yemen: and Mr. Mohammed Khater Zaid, the representative of the United Nations Office for the Coordination of Humanitarian Affairs (OCHA) in Kingdom of Saudi Arabia.

The discussions focused on areas of mutual interest and ways to strengthen coordination in support of development priorities in Yemen.

July 2026

Reviewing Implementation Plans for the Access to Education in Rural Areas Project

SDRPY reviewed implementation plans for Phase II of the Access to Education in Rural Areas Project, which aims to expand educational opportunities in rural communities. The second phase will provide 450 female high-school graduates with teacher-training diplomas, supporting the development of local teaching capacity and access to education in rural districts across Hadhramout, Al Mahrah, Marib, Taizz, Lahij and Shabwa governorates.

Building on Progress: Phase II of the Adequate Housing Project Launched

Phase II of the Adequate Housing Project has been launched in partnership with the United Nations Human Settlements Programme (UN-Habitat). The project rehabilitated 620 housing units for low-income families in Aden, Taizz and Lahij governorates, contributing to improved housing conditions and more secure living environments for beneficiary families.

Sustainable Solutions to Strengthen Water Security in Yemen

The Saudi Development and Reconstruction Program for Yemen (SDRPY) continues to support the water sector in the Republic of Yemen through development projects and initiatives designed to strengthen water security, improve the efficiency and sustainability of water services, and expand access to safe water.

These efforts contribute to improving quality of life and promoting stability in local communities.

SDRPY's water sector projects address development needs across several Yemeni governorates by developing water sources and distribution networks, drilling and rehabilitating wells, constructing and equipping water facilities, and integrating renewable energy solutions into their operations. These interventions promote the sustainable management of water resources, enhance operational efficiency, and reduce operating costs.

In Marib Governorate, implementation of the Enhancing Water Security Through Renewable Energy Project in Harib District is progressing. Jointly funded by SDRPY and the European Union and implemented by Selah Foundation for Development, the project has reached the trial pumping stage, marking a significant milestone towards supplying water to beneficiaries and establishing a more sustainable water supply for the local community.

By integrating sustainable solutions into the water supply system, the project aims to improve operational efficiency and ensure the continuity of water services. It is also expected to expand access to safe water, meet local water needs, and strengthen community resilience to water scarcity.

In Aden Governorate, the Enhancing Water Security Through Renewable Energy Project at Ahmed well field is nearing completion. Construction of the field's facilities has been completed, and the wells are ready to begin supplying water. A 600-kilowatt solar power plant has also been completed to provide a reliable, renewable source of electricity for water operations.

The project demonstrates how integrating renewable energy into water infrastructure can strengthen water security, enhance operational efficiency, and improve the reliability and long-term sustainability of water services.

These projects form part of SDRPY's broader efforts to develop the water sector, a key priority within its development interventions across Yemeni governorates. They underscore the vital role of water in improving public health, strengthening community stability, and advancing economic and social development.

Sustainable Solutions to Strengthen Water Security in Yemen

To date, SDRPY has implemented 62 water sector projects and initiatives across 14 Yemeni governorates. These interventions have focused on developing and upgrading water systems, strengthening distribution networks, and improving water infrastructure to enhance the sector's capacity to deliver reliable and sustainable services.

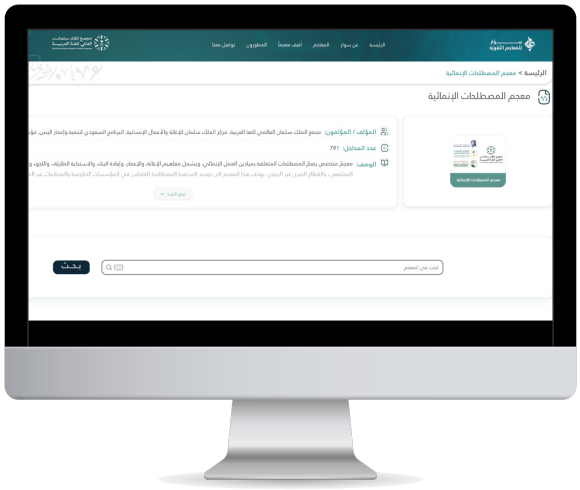

SDRPY's water sector interventions complement its projects and initiatives in other essential sectors, reflecting an integrated development approach that prioritizes infrastructure development, improved access to essential services, stronger institutional capacity, and sustainable solutions tailored to community needs. Together, these efforts contribute to advancing long-term development across Yemen.

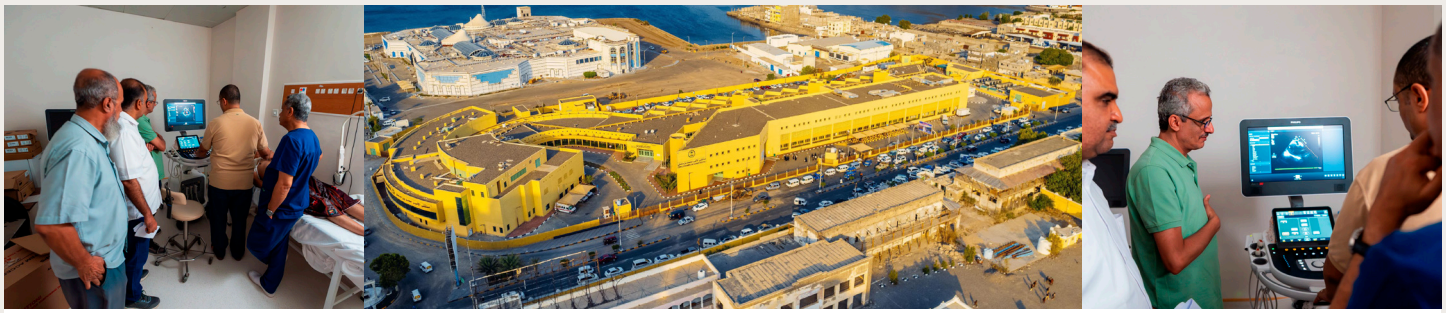

A Shared Language for Development: Introducing the Terminology Dictionary

The Development Terminology Dictionary has been launched by the King Salman Global Academy for the Arabic Language, in collaboration with the King Salman Humanitarian Aid and Relief Centre (KSrelief), SDRPY and the King Salman Non-Profit Foundation. Available through the "Siwar" Linguistic Lexicon Platform, the dictionary aims to unify terminology related to development, reconstruction, relief and humanitarian work, supporting consistency and accuracy in professional communication across these fields.

Prince Mohammed bin Salman Hospital in Aden Continues to Build Healthcare Professionals' Capacities

Prince Mohammed bin Salman Hospital in Aden continues to strengthen healthcare professionals' capacities through specialized training, including training on the use of echocardiography equipment. The hospital project includes the supply and installation of specialized medical equipment, alongside professional development programs such as the Yemeni Fellowship in Cardiology, diplomas in intensive care and respiratory care, and Arab Board training opportunities.

August 2026

Yemeni Officials Visit
King Salman Medical and Educational City in AlMahrah

Yemen's Minister of Water and Environment, Eng. Tawfiq Al-Sharjabi; Minister of Agriculture, Irrigation and Fisheries, Major General Salem Abdullah Al-Suqotri; and Governor of AlMahrah Governorate, Mohammed Ali Yaser, visited King Salman Medical and Educational City in AlMahrah. The visit provided an opportunity to learn about the city's facilities and its role in strengthening healthcare and educational services.

Technical Workshop Held to Improve Public Services in Abyan

A technical workshop was held in Zinjibar, the capital of Abyan Governorate, to discuss priorities for improving public services and infrastructure. The workshop was attended by Abyan Governor Major General Dr. Mukhtar Al Rabbash Al-Haithami and Eng. Ahmed Madkhali, Director of SDRPY's Office in Aden. Discussions focused on prioritizing high-impact, sustainable infrastructure projects and strengthening the delivery of essential public services.

Institutional Capacity-Building Program Launched for Yemen's Ministry of Youth and Sports

An institutional capacity-building program has been launched for Yemen's Ministry of Youth and Sports in cooperation with Saudi Arabia's Ministry of Sport. The program benefits 153 participants and covers key areas including community leadership, media and partner communications, first aid, and the management of camps and events. It aims to strengthen institutional capabilities and improve the effectiveness of youth and sports programs.

International Professional Teaching Certificates (IPTC) Project Concludes

The International Professional Teaching Certificates (IPTC) Project has concluded in Aden, with 200 teachers from Aden, Hadhramout and Taizz obtaining international professional teaching certificates. The project supports the development of teaching competencies and contributes to improving the quality of education in Yemen.

August 2026

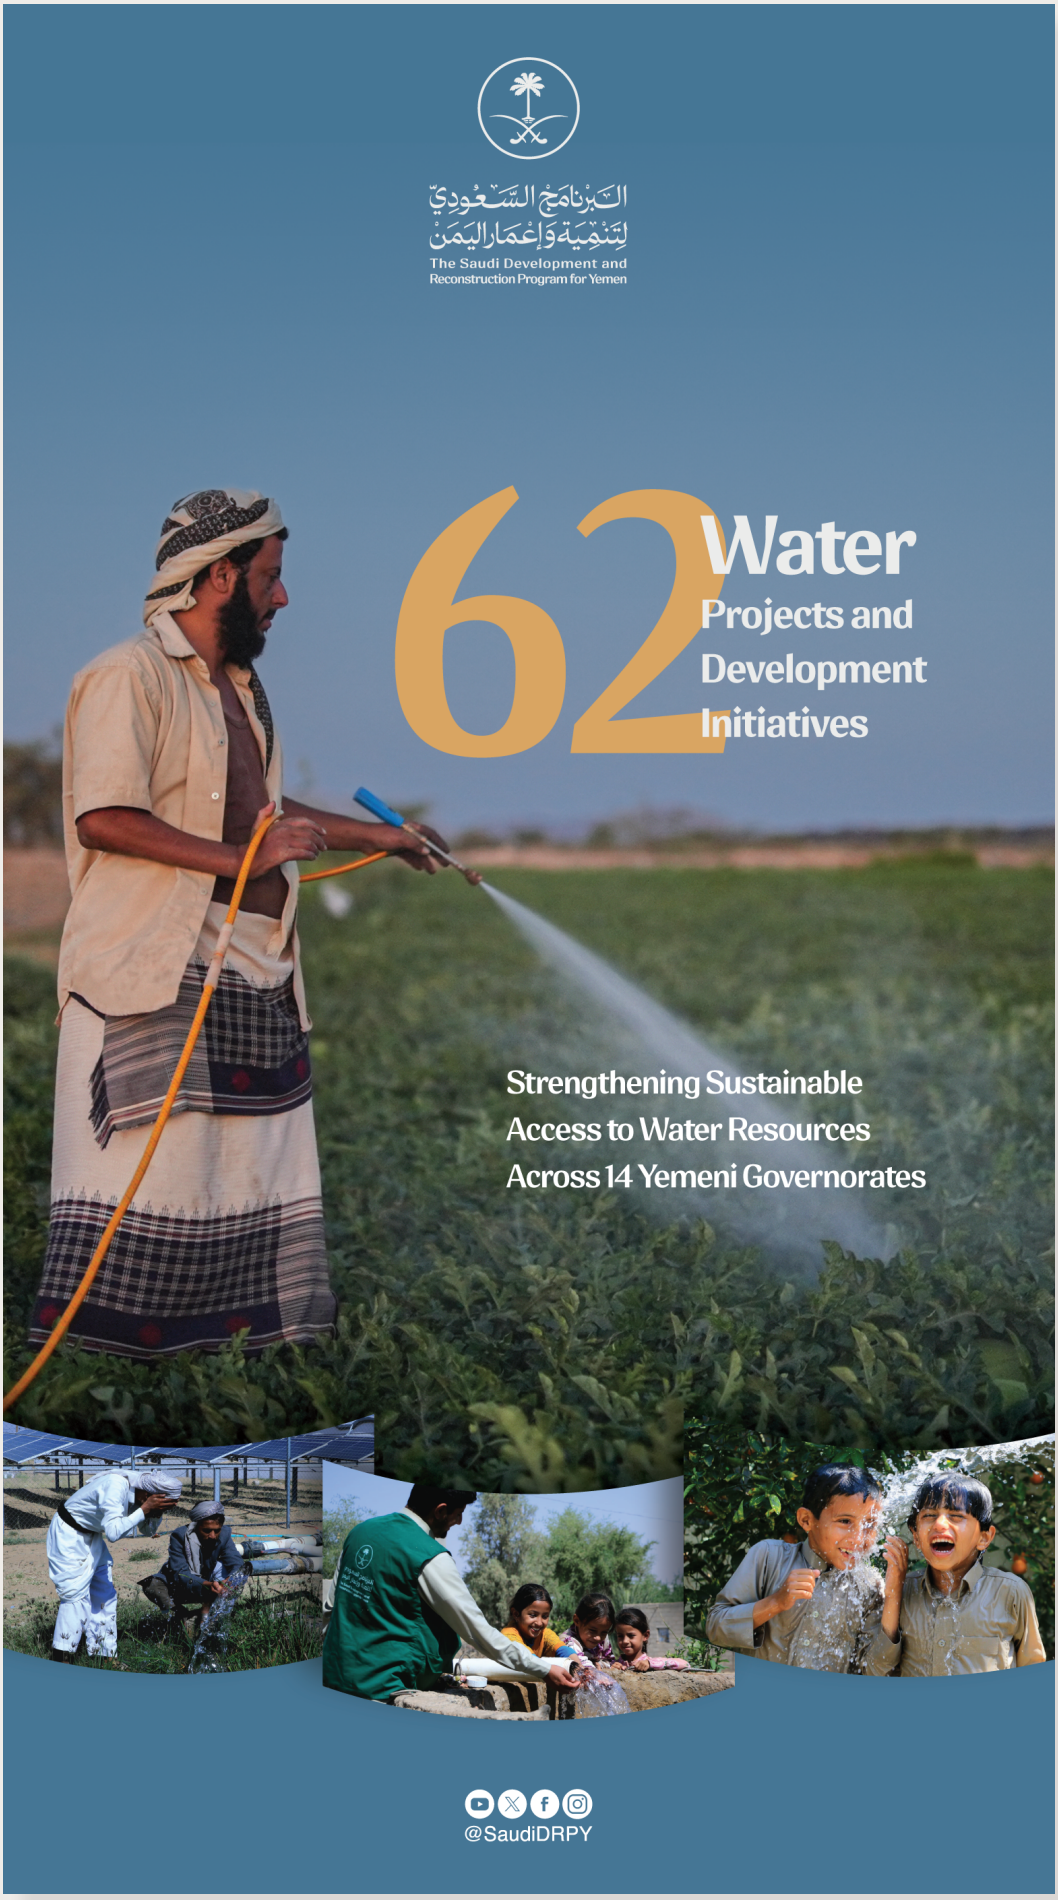

“MARKETS” Project Highlights Achievements

The Market Access Enhancement Project has made progress in strengthening the value chains of honey, coffee and onions across six governorates in Yemen. The project has supported 49 entities, 34 of which obtained international quality certificates, helping improve product quality and access to markets. It also contributes to job creation for young people and supports market connectivity through the YAM Market agricultural marketing platform.

Targeted Programs to Strengthen Workforce Capacity and Support Education

Education ranks among the key sectors of the Saudi Development and Reconstruction Program for Yemen's (SDRPY) development efforts. From general education classrooms to university campuses and vocational institutes, SDRPY has delivered projects that reach students, teachers and institutions across Yemen's education sector.

These projects include establishing, rehabilitating and equipping educational institutions, expanding access to education, strengthening workforce capacity, and developing professional and digital skills.

The city houses a 110-bed hospital, complete with outpatient clinics, emergency and radiology departments, intensive care units, surgical facilities, and a cardiac catheterization unit.

Additionally, these SDRPY projects have focused on expanding learning opportunities and improving educational environments through model schools, the development of universities, colleges and institutes, laboratory equipment, and school and university transport. These measures ease students' access to education and sustain continuity in learning.

In higher education, the Program has dedicated initiatives to expanding institutional capacity and enhancing academic and research environments. These initiatives help prepare qualified professionals in disciplines aligned with the needs of key sectors and the labor market across Yemen.

In public education, SDRPY has also implemented targeted initiatives to further support education personnel.

Targeted Programs to Strengthen Workforce Capacity and Support Education

They include:

- The International Professional Teaching Certificate (IPTC) project concluded with 200 teachers in Aden, Hadhramout, and Taizz obtaining the certificate. The program covered 50 pedagogical and practical skills and included in-school field applications.
- Under the Digital Empowerment for Yemeni Teachers project, 530 teachers and educational supervisors in Aden, Abyan, Hadhramout, Al Mahrah, and Socotra received training from 20 experts and trainers.
- To support educators in rural areas, the second phase of the Access to Education in Rural Areas project was launched with an orientation workshop. The workshop presented the implementation plan and the coordination strategy among project partners. The 2nd phase targets 450 female secondary-school graduates in Hadhramout, Al Mahrah, Marib, Taizz, Lahij, and Shabwa for teacher-training diplomas, and aims to address staffing needs and sustain education in rural communities.

Together, these initiatives raise teaching quality, improve learning outcomes, increase access to learning, and build the human capital Yemen needs. They contribute to a stronger education sector in Yemen and to the human capital that underpins the nation's long-term development.

September 2026

The Kingdom of Saudi Arabia

Announces New Support for the Central Bank of Yemen

Riyadh | In line with the Kingdom's leadership directives, Saudi Arabia has extended new financial support to the State Bank of Yemen to promote economic stability and prosperity for the Yemeni people. This support is designed to strengthen the foundations of Yemen's economic, financial, and monetary stability—enhancing purchasing power, improving living conditions, stimulating commercial activity, and fostering sustainable economic recovery across the Republic of Yemen.

September 2026

To Support Higher Education in Yemen,

SDRPY and Najran University Formalized a Memorandum of Cooperation

SDRPY and Najran University formalized a memorandum of cooperation on research, development, innovation, capacity building and accredited training. The memorandum establishes a shared framework to align higher education and technical and vocational training with labor market needs, in support of sustainable development in the Republic of Yemen.

September 2026

Saudi-French Cooperation to Advance Water and Infrastructure Projects in Taizz

Taizz | More than 139,000 people in the Governorate are expected to benefit directly from the "Enhancing Urban Water Systems" project, and over 242,000 more indirectly. SDRPY launched the project in partnership with Selah Foundation for Development, and in parallel with a French-led project aimed at improving the efficiency and sustainability of water and sanitation services. The projects aim to build climate-resilient urban infrastructure, provide training and technical support for the Local Water and Sanitation Corporation, improve asset management and maintenance, and reduce water losses.

SDRPY's Assistant Supervisor General Holds Bilateral Meetings

Projects delivered on the ground depend on partners who coordinate at the highest levels. Eng. Hassan Al-Attas, SDRPY's Assistant Director General, held a series of meetings with partners and stakeholders to strengthen cooperation and coordination. He met with Ms. Vanessa Frazier, Special Representative of the UN Secretary-General for Children and Armed Conflict, during which they highlighted the Kingdom's development efforts in Yemen through SDRPY. He also met Charlotte Coles, Development Director at the UK Foreign, Commonwealth and Development Office (FCDO), to discuss shared development priorities and areas for collaboration. Discussions with H.E. Salem Abdullah Al-Soqtari, Yemen's Minister of Agriculture, Irrigation and Fisheries, and Mr. Awad bin AlWazir, Governor of Shabwa, covered updates on SDRPY's projects in the governorate and measures for their implementation.

September 2026

Agricultural Inputs Distributed to Beneficiaries in Marib

Agricultural inputs have been distributed to beneficiaries in Marib under the Enhancing the Agricultural Value Chain for Smallholders Project, supported by SDRPY and implemented by the Estijabah Foundation for Humanitarian and Relief Works. The project covers Hadhramout and Abyan governorates and aims to strengthen agricultural livelihoods and support smallholder farmers. The initiative is expected to benefit approximately 2,300 households.

Arab League Economic and Social Council Commends SDRPY's Efforts

The Arab League's Economic and Social Council commended SDRPY's efforts during its 118th ministerial session in Cairo. The recognition highlighted the Program's contributions to institutional and human-capacity development, as well as its oversight of the Industrial and Commercial Institute Project in Aden, which supports vocational education and skills development in Yemen.

September 2026

SDRPY Participates in the Annual Conference of the Friends of Socotra Association

Representing the Program at the German-Yemeni Cooperation Days and the 25th Annual Conference of the Friends of Socotra Association in Berlin, an SDRPY delegation advanced key policy and development discussions.

The delegation contributed to several discussions, including a panel on balancing development priorities with sustainability requirements in Yemen, and a session on 'Opportunities and Challenges for Sustainable Development in Yemen and Socotra.' Across both forums, SDRPY highlighted the Program's development projects and initiatives and their impact on the Yemeni island of Socotra.

Additionally, the delegation, headed by Mr. Abdulhadi Al-Maleh, SDRPY's Assistant Supervisor General for Office Affairs, met Dr. Kay Van Damme, Chairman of the Friends of Soqotra Association. The delegation also met Ms. Marcela Masiarik of the German Federal Ministry for Economic Cooperation and Development (BMZ); Ms. Ellen von Zitzewitz, Deputy Head of Division VB1 at the German Federal Ministry for the Environment, Climate Action, Nature Conservation and Nuclear Safety; and Mr. Abdulaziz Al-Mikhlafi, Secretary General of the Arab-German Chamber of Commerce and Industry.
